

LET'S

MEET STEAMY!

Exactly the kind of Mascot
Zijing College needs.

GEARS – Zijing College

Gracielle, Elang, Alesha, Rafi & Steamy!

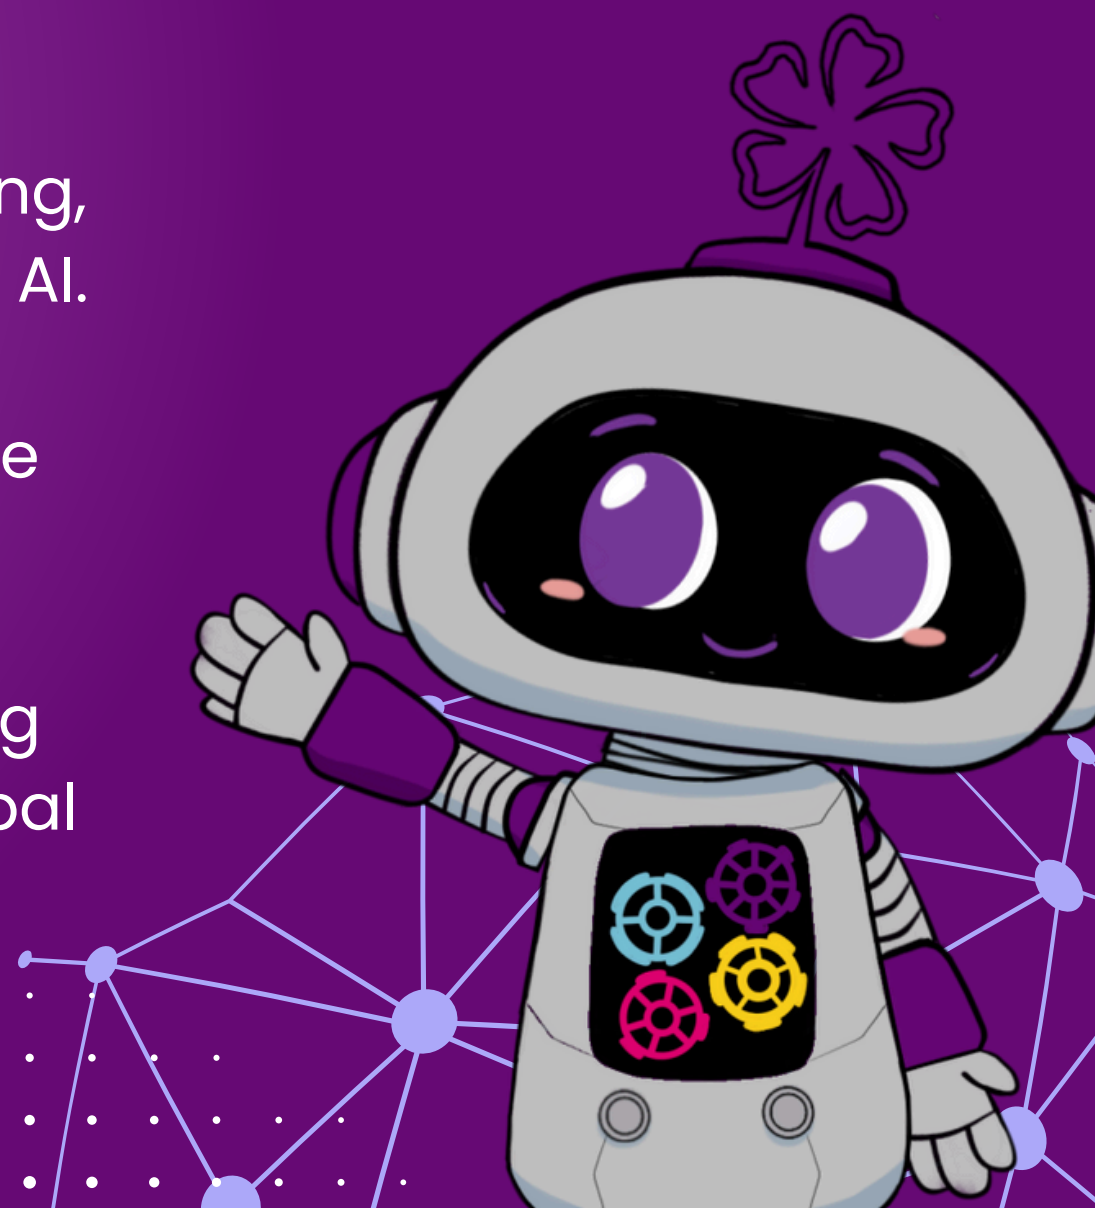

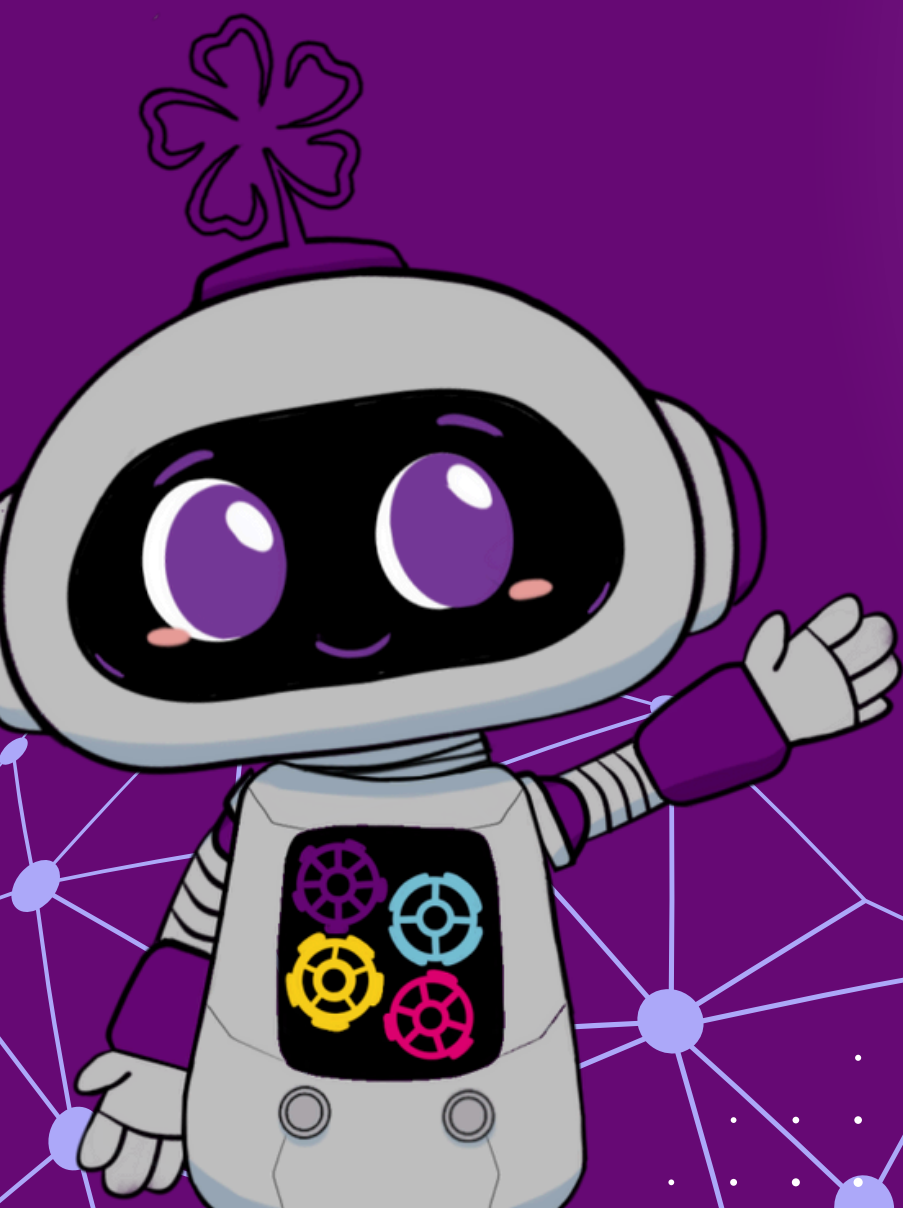

清华大学 紫荆书院

Zijing College, Tsinghua University

Zijing College embodies an interdisciplinary STEAM philosophy—integrating science, technology, engineering, and mathematics with the “A” of arts, architecture, and AI.

This dynamic fusion of fields, reflects our college’s core belief in innovative, interdisciplinary learning.

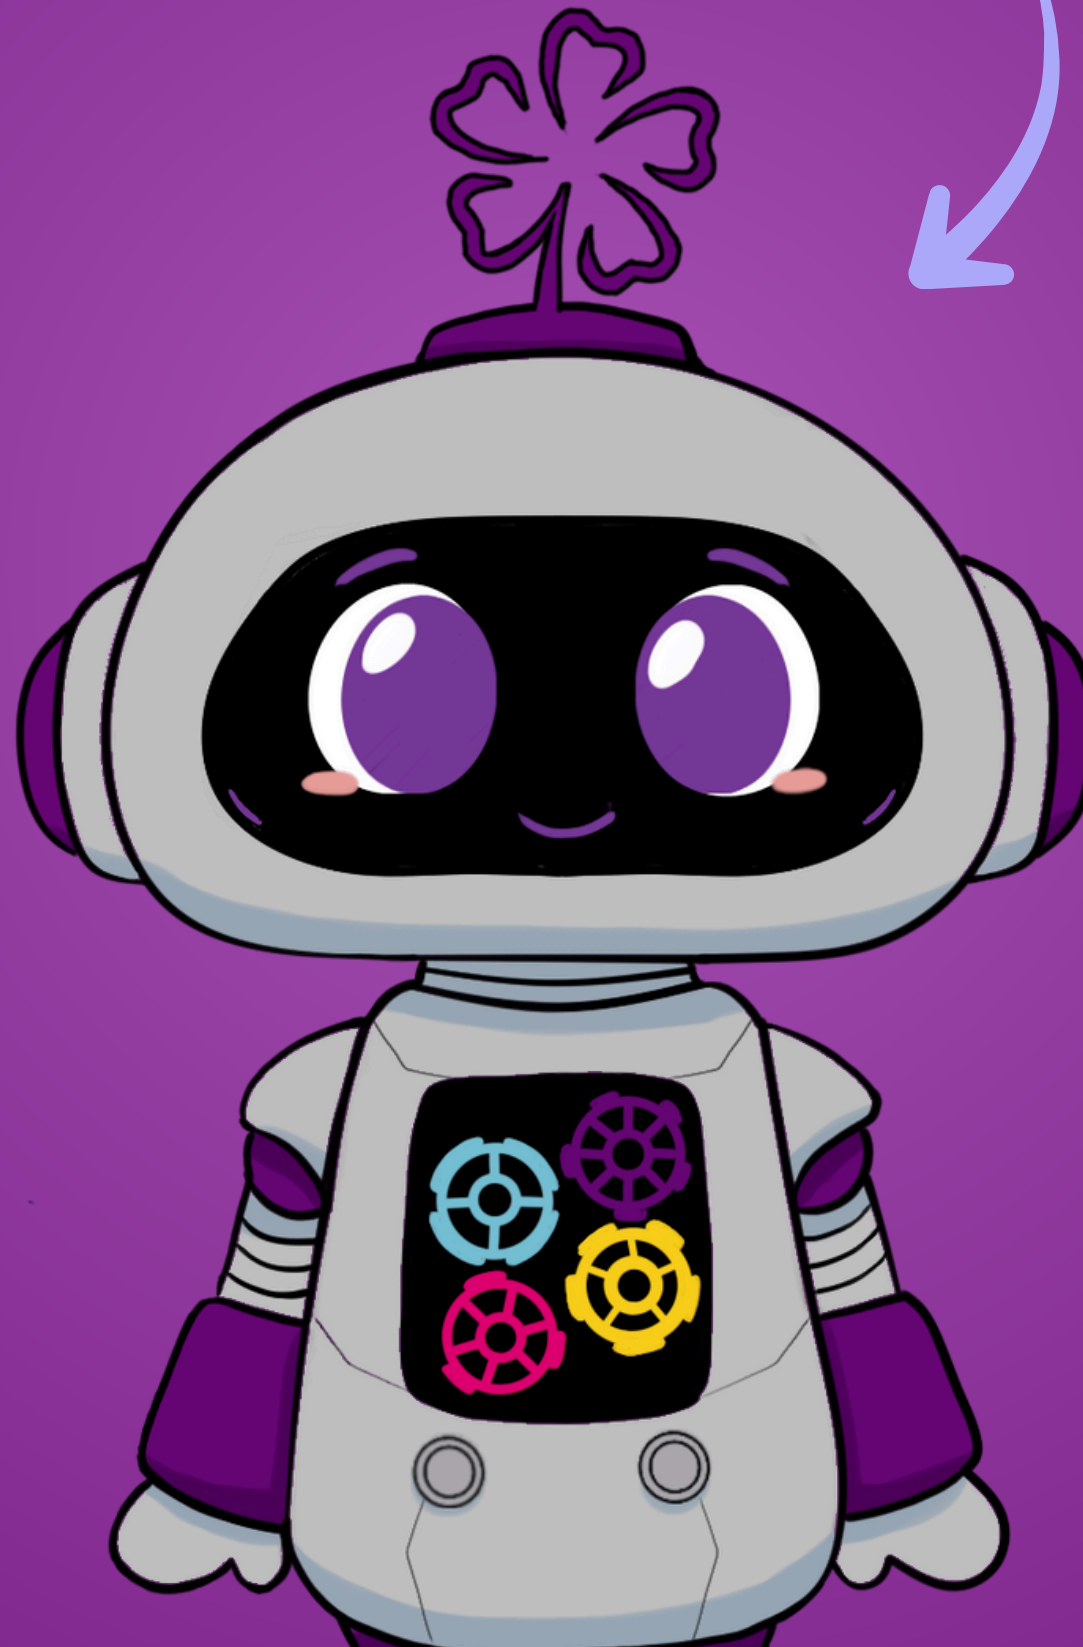

Zijing also emphasizes dialogue and symbiosis among civilizations, highlighting its strong commitment to global perspectives and cross-cultural exchange.

"STONE HEADED?" NO "FLOWER HEADED" YES!

Zijing Flower (紫荆花)

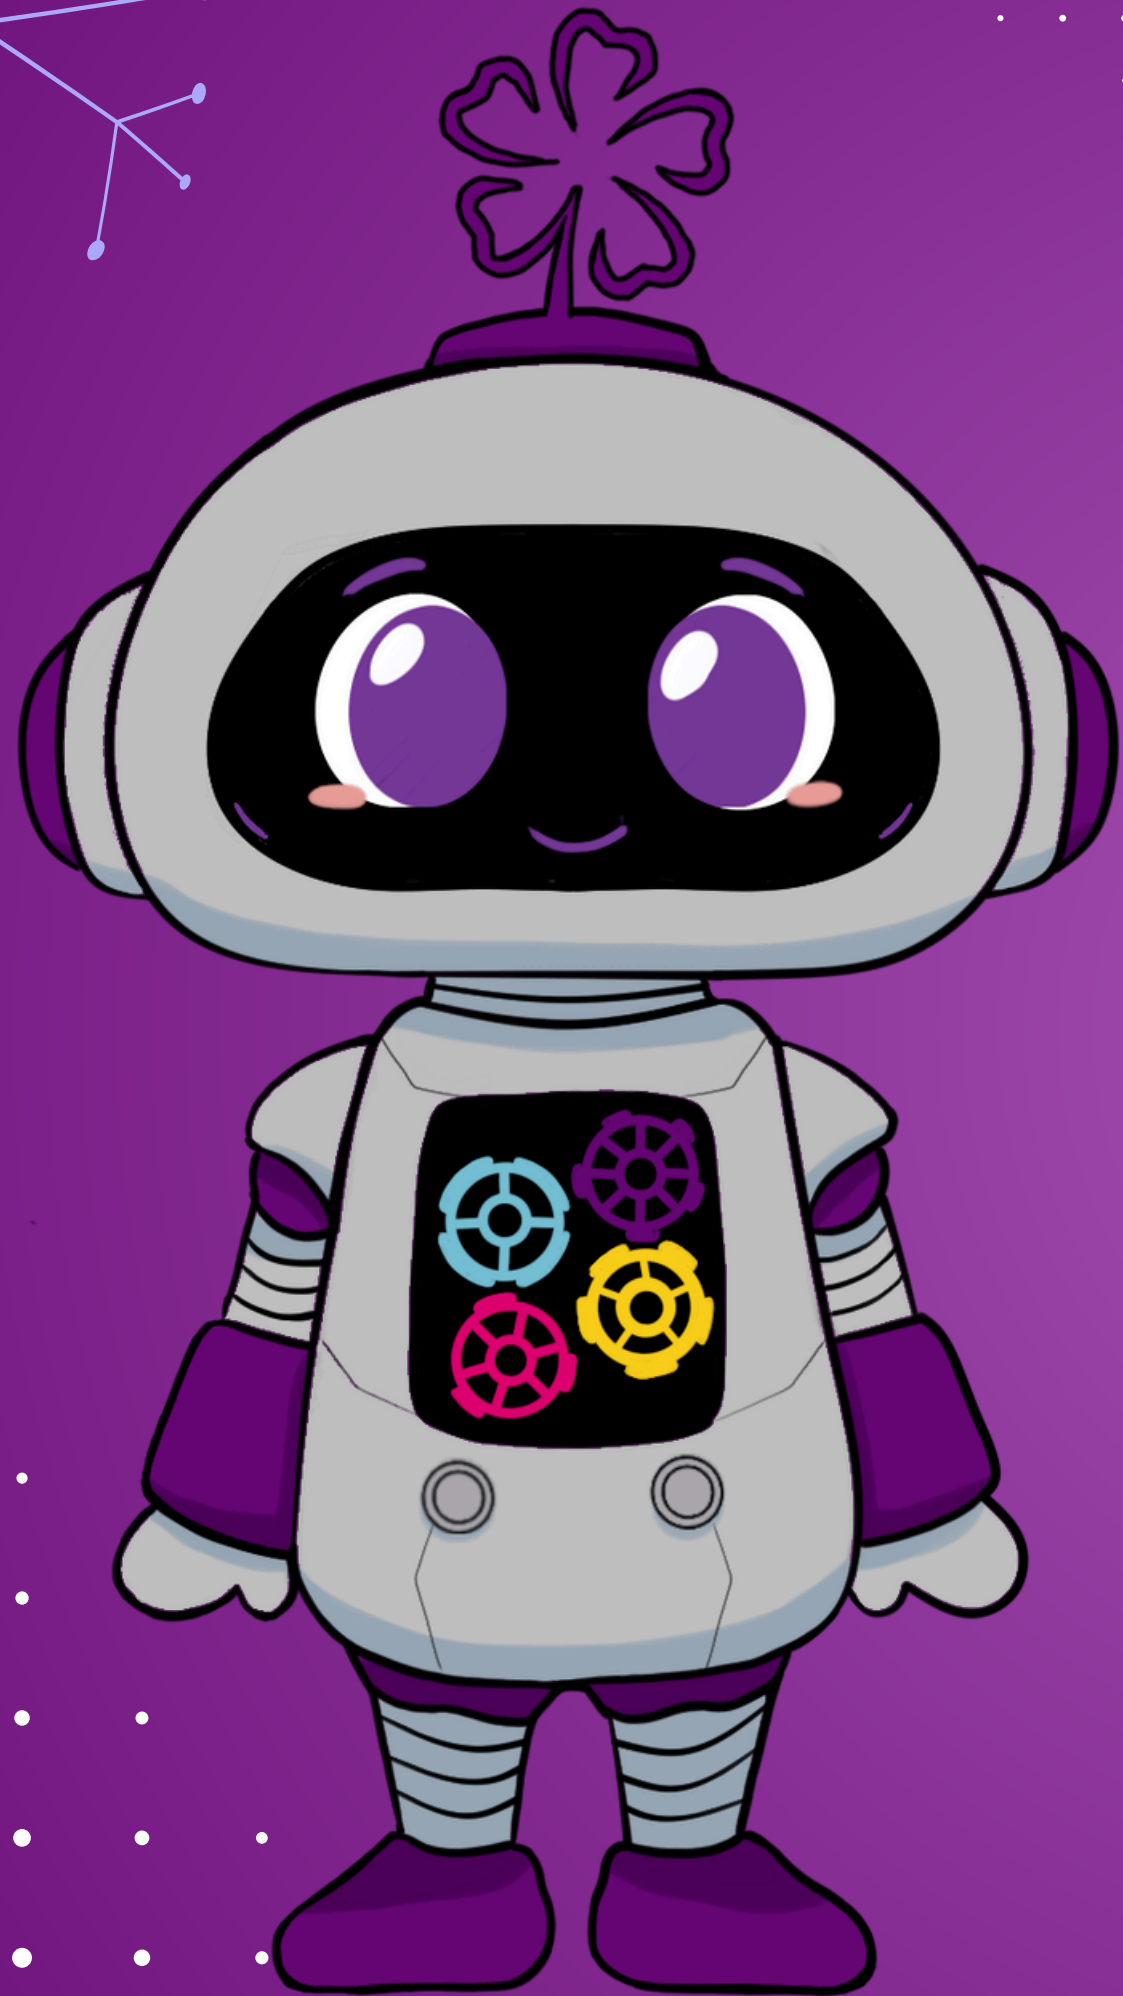

The mascot carries a **single Zijing flower** to symbolize **unity, harmony, and shared growth**. Instead of many flowers, one flower represents how the **Zijing community grows together as one**—reflecting our **collective spirit and connection**.

Flower Head (花头)

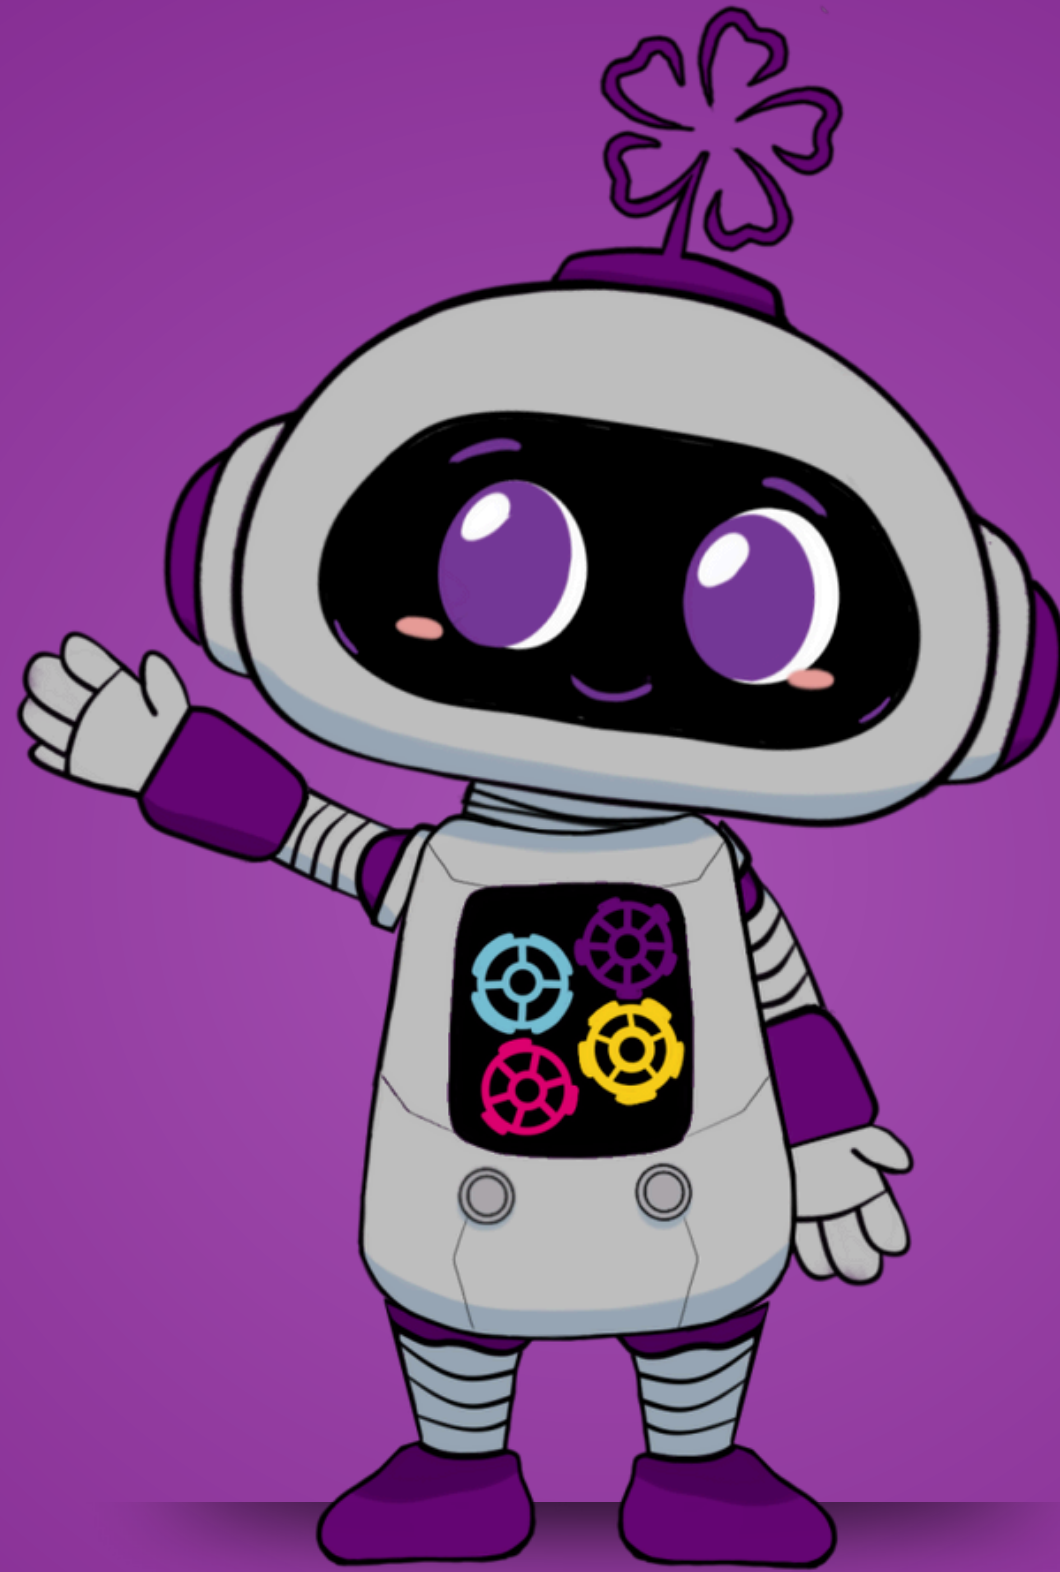

The flower grows from a the head or “mind”, expressing how **Zijing’s** cross-cultural, open-minded **philosophy takes root** in our thinking, **planted firmly in our minds**. It shows that an open mind is a mind that grows—and that **Zijing’s values are not only learned, but actively nurtured within** each of us.

STEAMY HAS A HEART TOO!

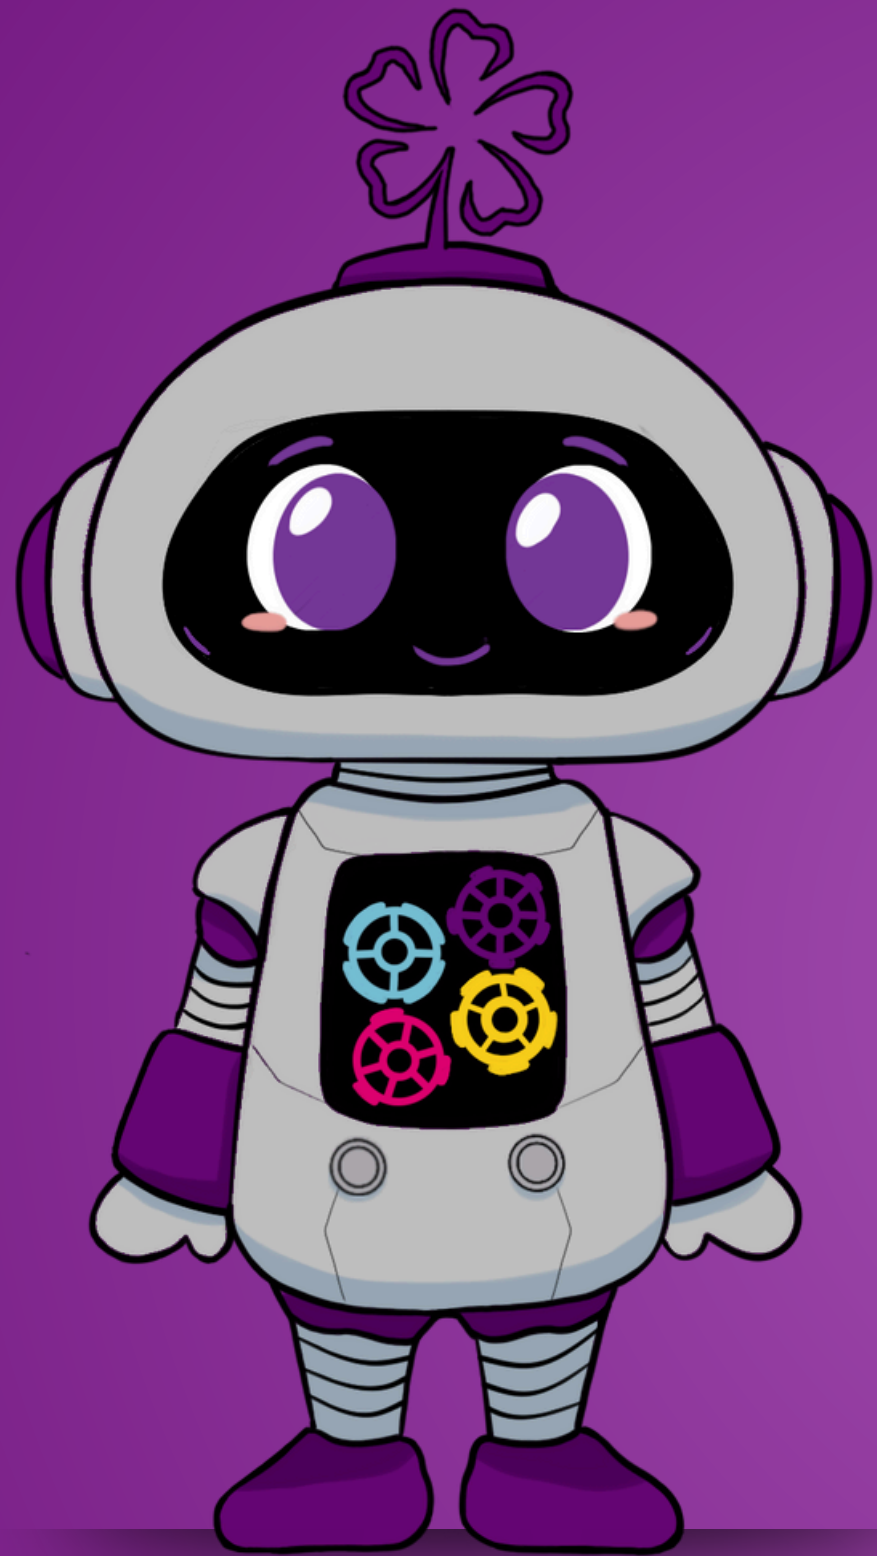

> The Heart: Interconnected Gears

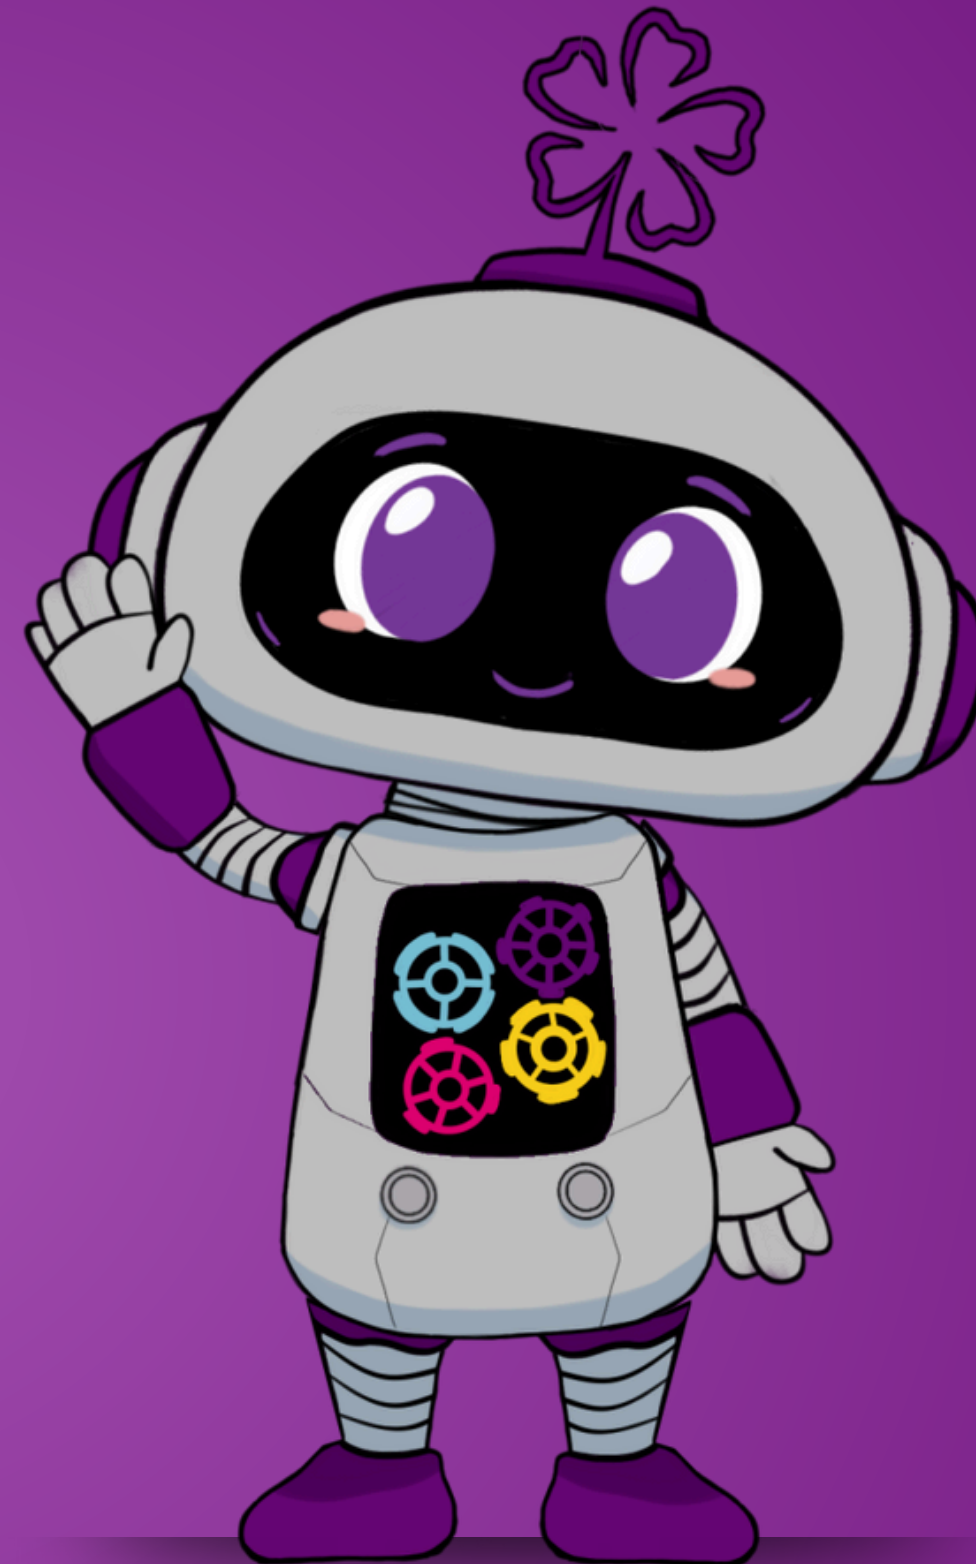

The robot's open chest reveals interconnected gears, symbolizing Zijing's **interdisciplinary nature** and **collaborative community**, no matter how different our chosen paths may be, whether in engineering, architecture, or beyond. Each gear represents a field of study and each member of our diverse community—**none can move alone, but together they drive progress**, reflecting Zijing's aim to **cultivate future leaders who think like conductors of an orchestra**: not defined by a single skill, but able to integrate many disciplines and guide them in harmony.

**I present you...
